PROFESSIONAL SUMMARY

Systems Analyst with 9+ years of IT experience supporting Microsoft 365, endpoint management, identity administration, and infrastructure across banking and military environments. Currently support 220+ employees across 9 branch locations in an FFIEC-regulated bank, administering Active Directory, Entra ID, Group Policy, Microsoft 365, Intune, NinjaOne, Windows Server, and VMware. Previous IAM experience includes CyberArk, SailPoint IdentityIQ, PowerShell automation, access reviews, and privileged account workflows.

TECHNICAL SKILLS

Core Administration: Active Directory, Entra ID, Group Policy, Microsoft 365, Intune, Windows Server

Endpoint & Support: NinjaOne RMM, imaging, software deployment, patching, remote remediation, Tier 2-3 support

Identity & Security: Conditional Access, Zero-Trust, MFA, RBAC, CyberArk, SailPoint IdentityIQ, privileged accounts, access reviews

Infrastructure: VMware ESXi/vCenter, Hyper-V, DNS, DHCP, TCP/IP, managed switches, backups

Automation & Compliance: PowerShell, FFIEC, NIST 800-53, DoD Standards

PROFESSIONAL EXPERIENCE

Senior Systems Analyst

Richwood Bank | Ohio (Hybrid) | Dec 2023 - Present

- Support infrastructure, identity, endpoints, and Tier 2-3 escalations for 220+ users across 9 branch locations in a regulated banking environment.
- Administer hybrid identity across on-premises Active Directory and Entra ID, including user and group lifecycle, permissions, Group Policy, Conditional Access, MFA/device-compliance controls, RBAC, and least-privilege access.
- Manage Microsoft 365 services including Exchange Online, Teams, SharePoint, OneDrive, and Intune, supporting mailbox administration, collaboration tools, endpoint compliance, and mobile device management.
- Operate NinjaOne RMM for 300+ endpoints, using monitoring, automated patching, remote tools, alerting, and remediation workflows to maintain consistent device health across distributed locations.
- Build, image, and deploy standardized workstations; package and deploy software; resolve desktop, laptop, printer, peripheral, OneDrive sync, and endpoint configuration issues.
- Create and maintain SOPs and playbooks for access requests, account lifecycle, infrastructure procedures, troubleshooting workflows, and support processes to improve consistency and audit readiness.

IAM & Security Analyst

Park National Bank | Ohio (Remote) | Oct 2022 - Dec 2023

- Administered CyberArk privileged access vaults for 100+ privileged accounts, supporting credential rotation, privileged session controls, and centralized password/secrets management.
- Built PowerShell automation for provisioning, de-provisioning, and access revocation, reducing manual access-management effort by approximately 40% while improving accuracy and audit traceability.
- Supported SailPoint IdentityIQ access certification campaigns, role-based access reviews, entitlement cleanup, orphaned accounts, and stale-access remediation to maintain least-privilege access.
- Reviewed access-control gaps and assisted with remediation across banking systems, strengthening privileged access, user lifecycle, and audit-readiness controls.
- Wrote IAM procedures and administrator documentation for account lifecycle, privileged access workflows, and evidence collection used by administrators and security stakeholders.

IT Specialist (25B) / Staff Sergeant (E-6)

Ohio Army National Guard - 1137th Signal Company | Ohio | Sep 2016 - Present

- Serve as IT Specialist and NCO supporting tactical and enterprise IT operations, user support, infrastructure administration, and soldier leadership.
- Deployed to Iraq from Aug 2024 to Jul 2025, supporting network infrastructure, communications systems, and continuity in a forward-operating environment.
- Administer Active Directory in field environments supporting up to 500 users, including account lifecycle, Group Policy, privileged accounts, and security standards under DoD requirements.
- Administer VMware ESXi/vCenter including provisioning, snapshots, resource allocation, backups, and stability for mission-critical systems.
- Configure and maintain servers, network switches, imaging baselines, and software deployments to keep systems standardized, secure, and available for operational use.
- Lead soldiers across technical and operational missions while balancing hands-on IT support, training, accountability, and mission execution.
